Instruction

REMOCON Remote Control can duplicate a majority of fixed code remote control in which set the fixed frequency at 433.92MHz. This means that each time the remote control is pressed, the same code is transmitted each time. It is not possible to copy any remote that utilizes Code Hopping or Anti-Code Grabbing Technology. This is because these types of remotes send a different code each time the remote is pressed.

The remote has four buttons so that it will universally suit most alarms i.e. some remotes have just one button for arming/disarming, where others may have separate buttons for multiple functions. The same code can be copied onto multiple buttons if desired. If your original remote has a function controlled by pressing multiple buttons together, you must duplicate that code to a single button on your REMOCON. You can also copy multiple remotes onto the one REMOCON, provided they all operate on the same frequency.

RMC611 Operation Manual

1 Place the REMOCON and original transmitter(i.e., Genie car garage door opener) right next to one another on a flat non-metallic surface.
2 Press & hold any 3 buttons on the REMOCON(433.92MHz) until LED indicator pulses 4 times.
3 Release any two buttons of REMOCON, and keep holding one button(1st button) of REMOCON which is required to be duplicated.
4 Press and hold the button of the original transmitter that you wish to program onto the REMOCON until LED indicator pulses 3 times.
5 Do not release the button(ex. 1st button) of REMOCON until you press and hold another button(ex. 2nd button) of REMOCON.
6 Repeat step 4. & 5. for duplicating 2nd button and other buttons on the REMOCON if required.
